Summary

Customer-focused engineer with strong problem-solving and communication skills, experienced in supporting real-time applications and resolving technical issues. Proven ability to understand user needs, troubleshoot efficiently, and deliver clear solutions. Passionate about improving user experience and system reliability.

Skills

Customer Success: Communication, Client Handling, Issue Resolution, Troubleshooting

Technical: Python, Java, HTML, CSS, JavaScript

Tools: Flask, FastAPI, OpenCV

Concepts: APIs, Debugging, System Workflows

Experience

AI & Computer Vision Intern — Robokwik

May 2025 – Jul 2025

- Developed and supported a real-time application used for gesture-to-text conversion, improving usability for end users
- Diagnosed and resolved 15+ technical issues, reducing runtime errors and improving system stability
- Assisted testers and users by explaining features and resolving technical queries
- Improved system performance and model accuracy by 18% through optimization techniques
- Collaborated with cross-functional teams to enhance usability and product experience

Projects

GramMitra — AI-enabled Web Platform

- Designed and developed a user-centric platform for rural planning and decision support
- Translated user requirements into functional modules such as land-use suggestions and budget planning
- Integrated backend APIs to process data and deliver actionable insights to users
- Simplified workflows, improving usability and reducing user effort by 15%
- Ensured system reliability by debugging issues and optimizing response handling

Security Sentry — Real-Time Monitoring System

- Built a real-time surveillance system to detect and notify users of security events
- Implemented event streaming and alert mechanisms for immediate user notifications
- Diagnosed and resolved performance bottlenecks, improving response time by 20%
- Reduced false alerts by handling edge cases and improving detection logic
- Focused on clear and actionable alert outputs to enhance user experience

AI Museum Guide — Interactive Assistant

- Developed an AI-based assistant to help users navigate and access information seamlessly
- Designed intuitive interaction flows for better communication with non-technical users
- Implemented NLP-based responses to handle diverse user queries
- Improved accessibility and engagement through user-friendly design
- Tested and refined system responses based on user interaction scenarios

Education

P.D.A. College of Engineering, Kalaburagi

B.E. Artificial Intelligence & Machine Learning

2026

Certifications

- R Programming — IIT Bombay
- Advanced Programming in C — Cisco Networking Academy
- Introduction to IoT — NPTEL
